[Increased solar activity for Field Day](#)

We have not seen numbers such as this since last September. This is good news just before ARRL Field Day, assuming the activity does not produce any geomagnetic disturbance.

Explaining the current capacitor shortage

In short, we are in the middle of a global capacitor shortage the likes of which the electronics manufacturing industry has not experienced since 2008.

1970s Citizens Band Radio culture

“It was before mobile phones, before the internet. It was the initial form of mass communication, a way you could chat to your friends for free,” says David Titlow as we talk about CB Radio, the now-obscure 1970s and 80s technology.
